

Ski Trails & Winter Recreation Areas Grooming Report

Thursday, February 15, 2018

This report is based on known conditions on the above date.
Please be aware that conditions may vary due to weather.

Trails are generally groomed once per week as staff resources and conditions allow. Trails will not be groomed if no new snowfall, extreme cold or mild weather occurs. Grooming commences only after inclement weather is over and roadways/parking lots are cleared. Heavy snowfall, mild weather, drifting snow and wildlife tracks all affect the surface of ski trails.

Skiers are encouraged to view and post snow reports on the [Cross Country Ski Association of Manitoba website](#).

NOTE! All trails are track-set for cross-country skiing, unless otherwise noted. Please note hiking/snowshoeing, snowmobiles and fat bikes (snow bikes) are not permitted on designated ski-only trails.

For more information, please contact the phone numbers provided for each park or email ParkInterpretation@gov.mb.ca.

Park	Trail Name	Date of Last Grooming	Snow Conditions at last grooming	Other Remarks
